Les flexibles de frein sont des composants intégrés dans le système de freinage. Leur fonction est de transmettre aux étriers ou aux cylindres de roues la pression de freinage par le maître cylindre. Les flexibles sont soumis à des tests extrêmement rigoureux qui garantissent leur qualité : vérification du diamètre de passage du fluide, tests sur la longueur, contrôle sous haute pression.

Brake hoses are parts of the braking system. Their use is to transmit to the callipers or wheel cylinders the pressure initiated by the brake master cylinder. Brake hoses have been submitted to high tech tests to guarantee maximum security. These tests involve the inside diameter allowing a fluent brake fluid flow, the length and high pressure resistance.

IMPORTANT

Il est impératif de remplacer le flexible par la référence correspondante au montage d'origine.

It is imperative to change the hose with the reference corresponding to the original fitting.

Quand changer le flexible / *It is needed to change the brake hose when:*

1. En cas de perte d'élasticité ou craquellements apparents

Losing its flexibility and becoming cracked

2. En cas d'oxydation à proximité d'un organe de système de freinage (signe probable d'une fuite).

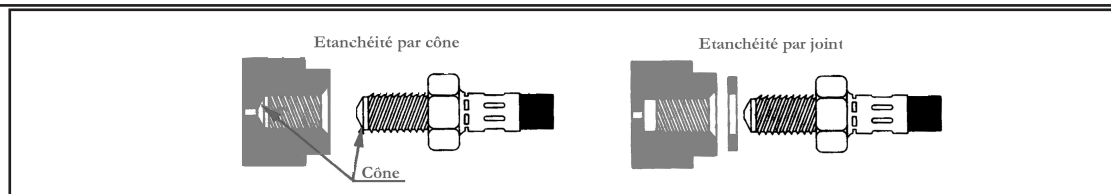

Detecting a rusty look next to a brake part may reveal a leak

Conseils techniques / *Technical advice*

1. Lors du remplacement contrôler :
 - a. Orientation du cône d'étanchéité
 - b. Caractéristiques dimensionnelles : longueur, pas
 - c. Emplacement : avant ou arrière, gauche ou droite

1. *When replacement, control :*

- a. *Type of fitting*
- b. *Dimensional characteristics, Sealing method cone or copper washer*
- c. *Location: front or rear, left or right*

2. Au montage

- a. Ne mettre aucune contrainte sur le flexible! Utiliser une clé à tuyauter pour le serrage.
- b. Ne pas vriller
- c. Eviter tout contact avec un élément de sous-caisse

- 2 *When fitting :*

- a. *Do not twist or put pressure on the hose ! use the right wrench to fit it.*
- b. *Avoid contact with the chassis part*
